# User Manual For Crypto Trading Bot

The crypto Trading Bot currently trades on the Binance Exchange. You will be required to have a Binance account if you do not have one already. You can use this link to sign up
https://www.binance.com/?ref=13690513
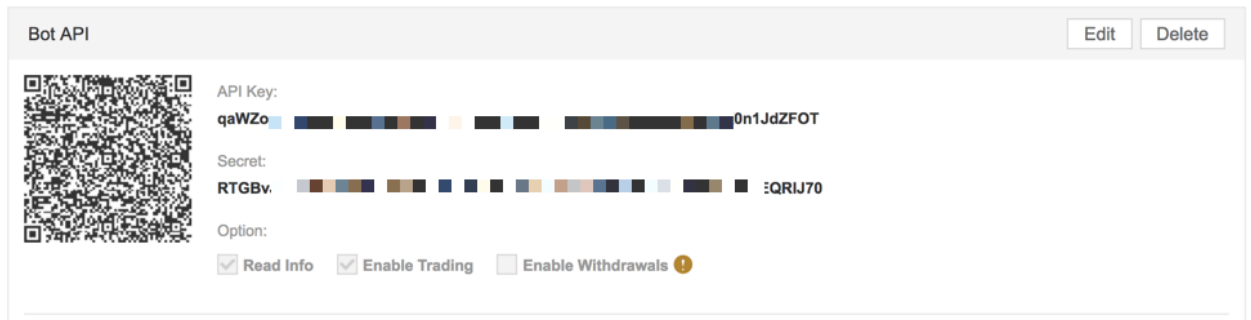

Generate an API on Binance

1. Click on label no.1 to enable two factor authentication.
2. Click on label no.2 (API Settings) to generate your API.

3. Give your API a name. Any descriptive name at all and click on Create New Key.
4. Enter your two factor authentication code.
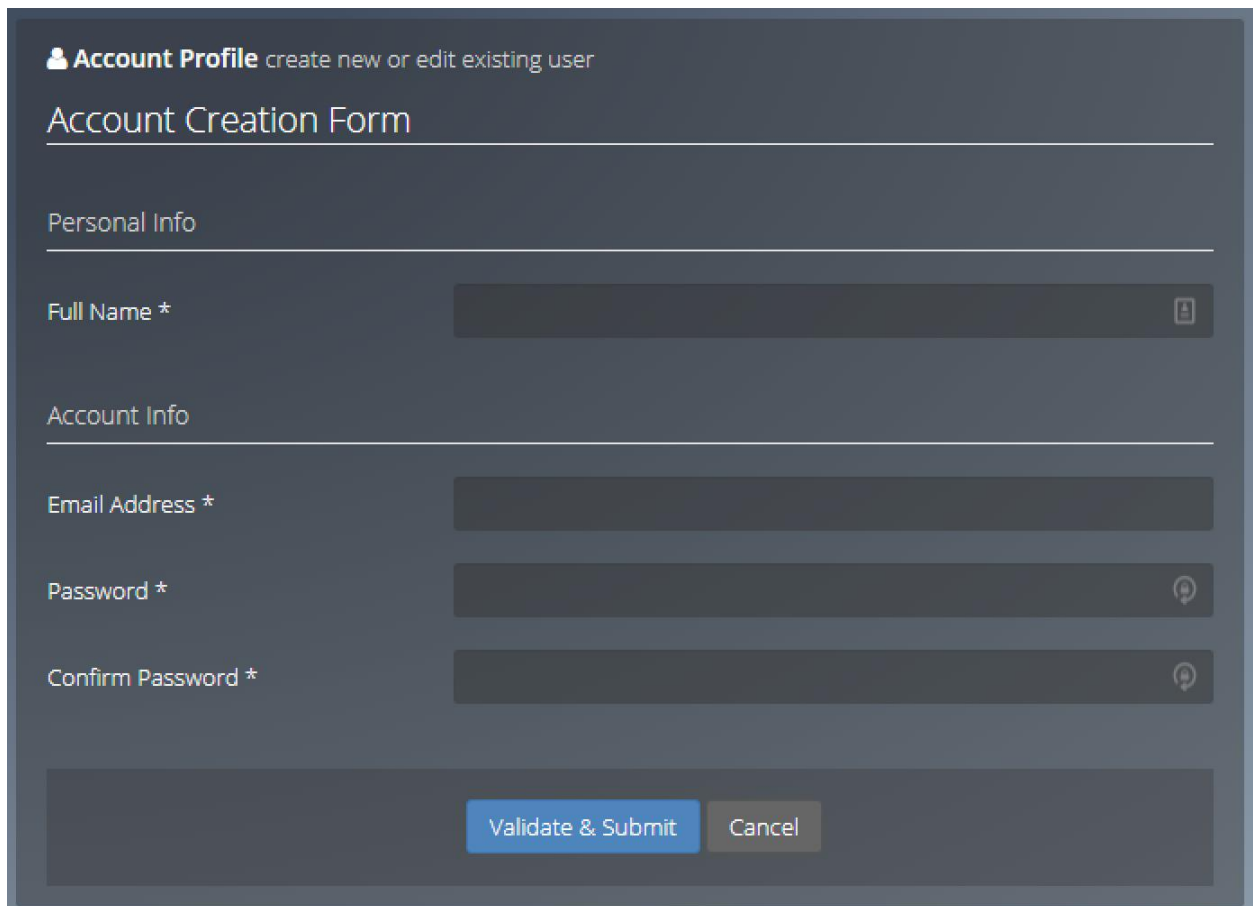

5. Copy your API Key and Secrete. You will need it later for the setup.

Sign up on the Trading Bot

6. Click on the link (http://clickmegh.com/cryptofolio/users/signup) to signup.
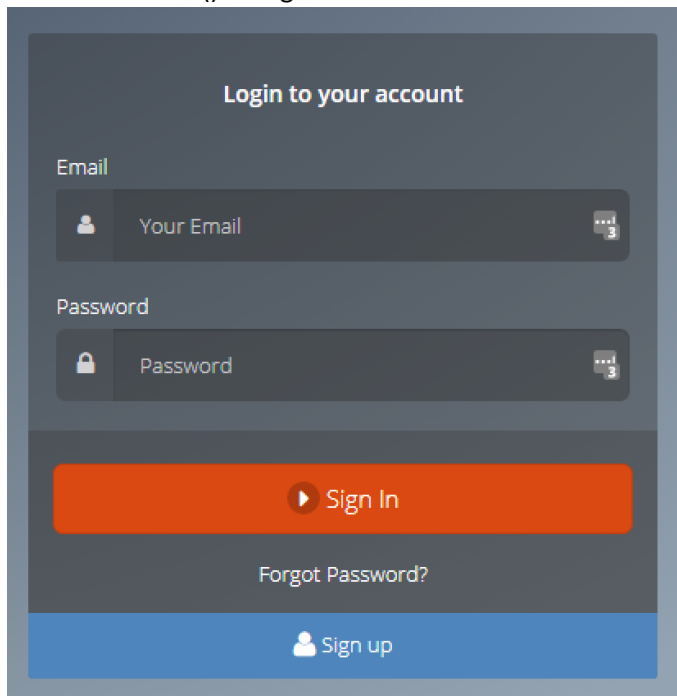

7. Fill the information and click on **Validate & Submit**
8. Go to your inbox and click on the activation link to activate your account.
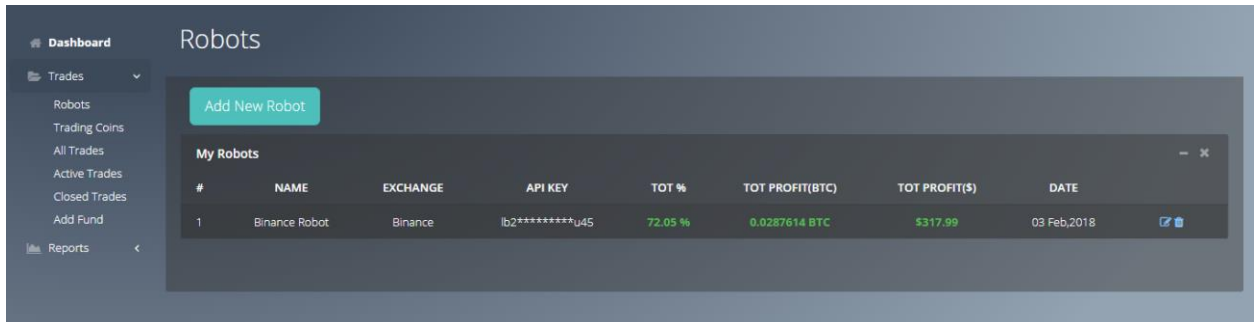

9. Click on the link () to login

After a successful login you will be redirected to the Dashboard.

Setup Your Trading Robot

10. Click on **Trades** to expand the menu and click on **Robots**. You will be directed to the screen below

11. Click on **Add New Robot** and you will be directed to the screen below.

12. Give your Robot a name. Copy and paste the **API Key** and **Secrete** you copied from Binance. Select the exchange and **Submit**.

Setup your Trading Coin

13. Click on Trades to expand the menu and click on Trading Coins. You will be directed to the screen below.

14. **Select the exchange, the trading pairs will be automatically listed in the next field.**
   Note: Refresh the page and select the exchange again if the trading pair does not automatically list.
15. Select your trading pair
16. Enter the amount you want to trade with in Bitcoin, example 0.01.
17. Turn the switch button **ON** if you want you profit to be added to your trading amount, otherwise you can leave it switched off.
18. Click on save to **save** your settings. Repeat the process for other trading pairs.

Add Fund

You will be required to deposit at least 0.005 btc on the app before your trades will be initiated.

In order to manage the Bot very well to serve you**, you will be charged 10%** out of every profit the bot makes for you. This charge will be ducted from the deposit you made.

To make the deposit, Click on Trades to expand the menu and click on **Add Fund**. An invoice will be generated for you with the amount and bitcoin address you are supposed to transfer to.

After making the transfer, Come back to the application and click on **Proceed with Payment**. Your balance will be created with the amount you transferred once it is confirmed on the block chain.

After doing all these your trades will be initiated with the amount of bitcoins you have in Binance exchange.

Please ensure you have bitcoin in Binance exchange.
